Through coherent planning and incremental sequencing, every student will deepen the knowledge and skills acquired and developed at KS2 to discern their vocation in order to build towards a rewarding and successful future beyond KS4. With Christ at the centre of our work and prayer, we will support students' moral, social and cultural development in a way that reflects our Catholic ethos while also ensuring they realise the importance of an active, healthy lifestyle.

Our high expectations married with appropriate levels of challenge and support will ensure all students will access their learning and fulfil their potential.

All our staff will endeavour to develop independent learning and personal resilience so that our students can strive for excellence in all they do.
